

EMIX Receptacle Panel

Emix has introduced its latest range of receptacle panels for ¼" (unbalanced), XLR (F), VGA (F) and RCA VAA. Built to high quality materials and standards and designed for common compatibility, these Emix receptacles are the best choice for your installations. They ensure the long term integrity of your installations. Among the features of these receptacles are:

- ✓ Stylish, durable, white colour Acrylic/PVC alloy body and face panel ensures long term strength and durability while providing performance, appearance and cost effectiveness
- ✓ Built to high quality standards with connectors from Japan, Taiwan and Neutrik
- ✓ Easily matched with "CLIPSAL", "MK", "PDL" 3-pin power wall socket panels
- ✓ One Gang British standard mounting panel size for common compatibility and matching
- ✓ More varieties coming out in the future to meet various requirements
