XR300 BEAM

Winner of the PLASA/09 Awards for Innovation

"The judges were refreshed to see this significant development in existing moving light technology. The XR300 allows full continuous rotation of both pan and tilt axis at some speed which will dramatically increase the creative possibilities using such fixtures (Source from UKSLC).

We are proud to announce that the new XR300 BEAM by D.T.S. is the Winner of the PLASA/09 Awards for Innovation. We are honored to receive this prize, as it confirms the extraordinary growth of D.T.S. over the last years, marked by the creation of unique products, such as the DELTA series LED projectors and the XR2000 series high-power moving heads.

The award ceremony took place on Monday, 14 September. The prize was handed to Silvano Latteo, President and Franco Zaghini, VP of Sales of D.T.S., who received the PLASA/09 Awards on behalf of the entire D.T.S. staffs.
