

## Small, Compact and Discreet

The Emix EMCS-531W is a 3" compact ceiling speaker built to blend in with the ceiling décor and yet deliver the performance of a conventional ceiling speaker.

The EMCS-531W is designed to be ID friendly, similar in size to most down lights, so it can be installed without being imposing. Despite its compact size, this 3" speaker still outperforms other speakers with its auxiliary HF cone coupled to the LF cone, providing a smoother and more extended frequency response. It comes with its own integral adjustable multi-tap 700/100 volt line transformer. A compact steel backcan with its own unique clamps and easy fitment of driver and baffle ensure easy installation.

***Perfect to please those with a discerning eye for discreetness.***

**Normal 6" Ceiling Speaker**

**Significantly Smaller with Emix EMCS-531W**

### **FEATURES :**
