

Wall Mount Box Speaker

EMWS-33x Series & EMWS-66x Series

Both 33x and 66x series wall mount box speaker produces quality performance and innovation for public addressing system. With 2 way full range speakers, both series deliver excellently in low, mid, high area. Both series come with adjustable mounting bracket. With this, angle is aligned to best position to ensure proper propagation of sound wave. Beside, build-in transformer allows wattage tapping. The enclosure which made of high quality plastic ensures better reproduction of low bass, a reasonably flat response curve, and low distortion.

With almost identical features between both series, **EMWS-66x** series differentiate itself by reproducing better music. EMWS-66x series speaker produces stronger and solid bass. Together with tweeter, which produces mid and high frequencies, the produced sound is warmer. Thus EMWS-66x series is excellent in creating ambience in any environment.

EMWS-66x Series

Meanwhile, **EMWS-33x** series, although is slightly edged in term of music reproduction, its speech reproduction is superior. With speech clarity in mind, the designers focus in enhancing human vocal range's frequency spectrum. The results are ultra clear, sonorous and intelligibility speech reproduction.
