Stereo Sound Enhancement Processor

The **SX3040 SONIC EXCITER** and **SU9920 SONIC ULTRAMIZER** are stereo sound enhancement processors that, through the use of harmonic enhancement and phase compensation, provide added depth and clarity to any stereo sound source. The result is an increase in bass definition, and a restoring of natural brightness, without the need for additional amplification. An added advantage is improved sound without additional stress being placed on sound system speakers. **The processor can provide stereo enhancement for project recording studios, DJ systems, "house of worship" sound systems, keyboard racks, web-casting, and even 5.1 and hi-fi home setups.**

SONIC EXCITER **SX3040**

The SX3040 is another very low-cost way to add a bit of punch and sparkle. A high-pass filter would help clean up the bottom end of the SX3040.

SONIC ULTRAMIZER **SU9920**

The SU9920 could benefit from the inclusion of a stereo link function. It is a simple product offering an alternative to using EQ and compression to improve aspects of a mix.

- Produces natural brightness through harmonic enhancement and tighter bass with increased punch through phase compensation
- Brings out the full sound spectrum of tracks, a mix or in mastering, suitable for both professional and home recording studios
- Improves the performance of a sound system without requiring additional amplifiers or power
- Suitable both for studio and live PA systems, churches, nightclubs and DJ systems
- Broadcasting and webcasting: adds loudness and "live presence" even on small car or computer speakers
- Guitar, bass and keyboard rack: improves articulation and restores cutting power often lost in miking and amplification
- 5.1 and hi-fi setups: DVDs become stunningly lifelike and the spatial dimension of your sound system increases dramatically
- Servo-balanced inputs and outputs with 1/4" TRS and gold-plated XLR connectors

KEY FEATURES

Sonic Exciter SX3040	Sonic Ultramizer SU9920
Dedicated Tune, Harmonics and Mix controls per channel on the Sonic Exciter section	Dedicated Low contour and Process controls per channel for ultimate sound enhancement
Dedicated Drive, Tune and Mix controls per channel on the Bass Processor section	Accurate five-segment LED level meters
High-quality components and exceptionally rugged construction ensure long life
