▣ Suresh rocks at "KL INDIE FEST 08"

Malaysia: The grounds at KL Menara, also known as the KL Tower was packed to the edge when it became the outdoor venue for the "KL INDIE FEST 2008" concert held recently in the capital of Kuala Lumpur. The gig featured local bands from all over Malaysia, with performance from OUG, Butterfinger, One Buck Short, and many others. **Suresh Entertainment** was hired to bring the sound and lighting from the stage to the crowds for the rocking event. Main FOH reinforcement was an IVA Line Array system comprising 2 hangs of IVA MLA-126 Top (4 per hang), augmented by 4 IVA MLA-118S Subwoofers – stacked-up as 2 per side under the FOH hangs. IVA Power Amplifiers were assigned to drive the IVA cabinets. Onstage, 8 Nexo PS15 loudspeakers doubled as monitor wedges and powered by Camco Tecton Series amplifiers. Main sound desk for the gig was a Yamaha M7CL Live Digital Mixing Console. Lighting effects was mainly covered by 8 Robe ColorSpot 1200 AT moving heads – mostly being floor positioned at front-of-stage, side stage for cross sweeps and back stage.
