

IVA Amps Go **NEUTRIK**

IVA amplifiers have been upgraded with industry standard Neutrik connectors. The XLR inputs and Speakon outputs have been upgraded to Neutrik connectors to add value and Performance to the IVA amplifiers. With these upgrades, IVA amplifiers are more compliant to industry standards and professional requirements of the discerning customer.

Neutrik connectors will ensure that IVA amplifiers will have the following qualities:

- More Reliable and Durable Connections
- Better Contact Conductivity
- Consistent Connection Compatibility
- Improved Performance due to better input and output signals

Currently, em-4.5, M-7.0, M-10 and Pro-12 models have undergone this upgrade. Eventually, all IVA amplifiers will come with Neutrik connectors.
