

Solution for High Ceiling

EMCS-805: 3-Way Ceiling Speaker

With its 40w high power design, it is ideal for places with high ceiling with a range from 3 to 5 meters. It is excellent for speech and background music in an indoor public address system.

EMCS-806sub: Ceiling Sub-woofer

The EMCS-806sub is a complete low frequency speaker for any PA needs. This is an ideal ceiling sub-woofer which consists of 8-inch woofer, grille and internal line matching. The transformer offers a selection of 10, 20 and 40 watts (100V only).
