**ZED SERIES MIXERS**

**MULTIPURPOSE MIXER WITH USB FOR LIVE SOUND, RECORDING AND PRODUCTION**

**ZED-series** has a fantastic pedigree which comes from nearly 40 years of making mixing desks for the professional sound community. The audio circuitry is

based on years of continual development and refinement and the performance of all the elements within the mixer is has been perfected to ensure the very best sound quality possible. This is a mixer for anyone, from entry-level to professionals, who appreciates fantastic sound, rugged build quality and imaginative feature sets. It'll be equally happy running your gig on stage, recording live or mixing down in your studio at home. We've teamed up with major software supplier, **Cakewalk**, to bundle its **SONAR LE** music creation and audio production software with ZED, giving you a fantastic, high spec digital audio workstation.

**ZED FX**

**ZED SERIES MIXERS**

**MULTIPURPOSE MIXER WITH USB FOR LIVE SOUND, RECORDING AND PRODUCTION WITH ESSENTIAL ON-BOARD FX**

Complementing the existing ZED series, the ZED FX has been developed around an FX chipset purely for the new model. Our

DSP engineers have been working hard, crafting and refining beautiful reverb algorithms. The effects are available nowhere else - this quality and integration is only available from the ZED FX. 16 essential time-delay effects add to the already bulging feature set. The mixer is ideal for small groups who don't want to carry around an effects unit with their gear but who still want great quality FX at their gigs and on their recordings.
