

## Spark up your life with **PROEL Spark Series**

SPARK series speakers are not your usual everyday PA speaker for announcements. It not only provides crystal clear voice reproduction, but is also designed to produce a wide frequency range, making it highly suitable for reproducing music in high fidelity quality. With this unique design, it produces smooth and soothing audio to provide the desirable ambience required by today's sophisticated F&B and retail outlets.

But SPARK is not just appealing to the ears, but also appealing to the eyes. Its unique Italian designer outlook makes it pleasing to the eyes, without being obtrusive. It blends well with the interior design of most retail and F&B applications. Available in white or grey colour, it will suit the colour schemes of most walls and ceilings. This makes it a favourite among outlet owners and interior designers.

Proel SPARK Series speakers come in white or grey colour, available in 3.5", 5" or 6.5" woofer sizes, 15W to 40W power ratings, to suit various output levels desired. Available with or without constant voltage line transformers for Pro or PA applications. 5" and 6.5" coaxial square ceiling speakers designs are available in white.

### Proel Spark Series

The SPARK wall-mount speaker series is developed by Proel to offer the best solution for all ambient installations. This series is composed of six 2-way models available in passive versions or with constant voltage line transformers (70V - 100V switchable). There are also 2 ceiling-mount coaxial models

with constant voltage line transformer (70V - 100V switchable). The SPARK series is realized with a highly rugged, scratchproof Polypropylene plastic molding and features controlled directivity horns that allow the optimum diffusion of the mid-high frequencies for high intelligibility. All models feature magnetically shielded transducers, to allow installation near video devices, and electronic protection circuits for high tweeter reliability. The wall mount models are available in anthracite grey or white and are equipped with an adjustable metal bracket with wide settings for easy installation. The ceiling models are available in white and feature self-locking brackets for easy mounting.
